

JASSER NAHALI

FULL STACK DEVELOPER

nahalijasser1@gmail.com | +216 29523985 | jasser-nahali.netlify.app | Tunis, Tunisia

SUMMARY

Motivated Full Stack Developer with hands-on experience in modern technologies including Next.js, React, Ionic, Node.js, TypeScript, Angular, and Spring Boot. Specializing in responsive frontends, scalable backends, real-time features (WebSockets), secure authentication (JWT), testing (Jest), and containerization (Docker). Improved user engagement by up to 30%, reduced response/processing times by 20-25%, and ensured 99.9% data accuracy/uptime across projects. Pursuing Engineering Degree in Web Technology / Cloud Computing at ESPRIT University. Strong team player in agile environments, code reviews, and collaborative development. Fluent in Arabic (native), English (proficient), French (intermediate). Seeking internship or part-time opportunities.

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern - Code-Dual (Real-Time Competitive Coding)

15/06/2026 - 21/08/2026

Medianet

Tunis, Tunisia

- Engineered a low-latency duel synchronization system using Socket.io and WebSockets for a React and Fastify stack, enabling instant opponent activity tracking, live code state restoration, and real-time victory determination.
- Integrated Judge0 and Docker containerized sandbox execution, safely processing multi-language submissions (JavaScript, Python, C++, Java, Rust, Go) against hidden test suites under tight time/memory constraints.
- Built an event-driven single-elimination tournament engine featuring 1-click bracket generation, ELO-based seeding, 15-minute attendance check-in, auto-forfeit handling, and instant round advancement.
- Designed a competitive ELO rating system, dynamic tier ranks (Bronze to Master), interactive global leaderboards, and custom achievement badge rewards.
- Implemented JWT authentication with secure HTTP-only cookie refresh tokens, Fastify rate-limiting, and Nodemailer/Resend automated email verification pipelines.
- Leveraged PostgreSQL and Prisma ORM for robust and type-safe database management.

Full Stack Developer - Nutriwell-Store (E-Commerce & Health Retail)

Present

Personal Project

Remote

- Engineered an end-to-end online checkout system featuring real-time total calculations, unique order reference generation, transactional database operations, and admin-driven order lifecycle management.
- Built a multi-attribute product catalog with dynamic multi-filter taxonomy, dynamic nutrition tables, gallery uploads, user reviews, and visibility controls using React, TypeScript, and Vite.
- Developed a real-time store locator map using Leaflet and OpenStreetMap APIs, providing interactive radius search, GPS mapping, real-time pharmacy filtering, and one-click Google Maps directions.
- Created an admin editorial suite to manage products, healthy recipes linked to store items, dynamic homepage content, customer contact reports, and multipart file upload handling via NestJS and Multer.
- Implemented session-based admin authentication with HTTP-only cookies and Bcrypt password hashing, packaged into multi-container Docker environments and automated via GitHub Actions SSH remote deployment to a VPS.
- Integrated TanStack Query for efficient server-state management and Framer Motion for fluid UI animations.

Developer - KiddySafe Monorepo Boilerplate

07/2025 - 08/2025

Remote

Switzerland

- Developed complete production-ready monorepo starter template for secure, real-time, location-aware family safety apps using Next.js, Ionic React, Tailwind CSS, Capacitor, Leaflet/OSM, Node.js, Express, TypeScript, Prisma (PostgreSQL), JWT, WebSockets, Jest, React Testing Library, and Docker.
- Implemented responsive cross-device frontend with Next.js, Ionic React, and Tailwind CSS, enhancing user experience and compatibility.
- Architected scalable backend with Node.js, Express, and Prisma, integrating real-time WebSocket features for improved functionality.
- Incorporated advanced security measures including JWT authentication, end-to-end encryption helpers, secure cookies, and session/device binding.
- Established comprehensive testing suites with Jest (backend) and React Testing Library (frontend), achieving high code coverage and reliability.
- Dockerized application using multi-stage Dockerfiles and Docker Compose, enabling seamless local and cloud deployments.

Developer - Field Intervention Management Project

01/2022 - 07/2022

lprecision

Tunis, Tunisia

- Developed comprehensive system to manage client-service provider interventions, successfully tracking over 100 interventions with enhanced efficiency.
- Engineered responsive frontend using Angular, resulting in 30% improvement in user engagement metrics.
- Architected and implemented scalable backend with Spring Boot, achieving 20% reduction in system response time.
- Established and maintained MySQL database infrastructure, ensuring 99.9% data accuracy and availability.
- Performed systematic API testing using Postman, identifying and resolving 95% of critical bugs before deployment.
- Implemented code quality assurance with SonarQube, reducing code issues by 40%.

Developer - Shop Management System Project

01/2021 - 02/2021

Siamo Startup

Tunis, Tunisia

- Developed inventory management solution for registering and tracking over 200 products, significantly enhancing inventory accuracy.
- Built robust backend with Spring Boot, improving system efficiency and reducing processing time by 25%.
- Implemented MySQL database management strategies, ensuring 99.9% uptime and data integrity.
- Conducted comprehensive API testing with Postman, successfully identifying and resolving 90% of issues prior to deployment.

EDUCATION

Engineering Degree in Web Technology

2024 - Present

ESPRIT University

Tunis, Tunisia

License in Technology in Computer Science

2020 - 2023

ISSET Mahdia

Mahdia, Tunisia

Bachelor of Computer Science

2018 - 2019

Ibin Arafa

Tunisia

SKILLS

Technologies: Next.js, React, Ionic, Tailwind CSS, Node.js, TypeScript, PostgreSQL, Prisma, JWT, WebSockets, Jest, Docker, Angular, Spring Boot, MySQL, Postman, SonarQube, Agile, Git, NestJS, Fastify, JavaScript, HTML5, CSS3, SQL

ADDITIONAL INFORMATION

Languages: Arabic (Native), English (Proficient), French (Intermediate)

Interests & Soft Skills: Experienced in agile sprints, code reviews, collaborative environments; additional skills in video editing and image editing.
